

### tissue/culture prep

isolation  
fixation  
embedding  
sectioning  
coordinates  
clearing

### probe design and construction

genes  
mRNA targeting oligos  
detection method  
fluorophores  
amplification  
hybridization rounds  
extinguish method  
error correction code

### imaging

objective  
exposure time  
fields of view  
laser lines to excite fluorophores  
beads (alignment, chromatic, psf)  
nuclear marker

### metadata

### raw data

per field of view  
raw\_stack.tif  
dapi.tif, antibody.tif

codebook schemas  
hyb | bit position  
gene | bit-string

### registration

per field of view  
reg\_stack.tif  
affine\_transform.mat

global  
chromatic\_correc.mat  
references.csv

### preprocessing

per field of view  
proc\_stack.tif  
cells\_geo.json  
spots\_geo.json

encoder table schema  
cell\_id | spot\_id | x | y | z | hyb | val

### decoding

quality metrics  
assay\_comp.json  
control\_barcodes.json  
metrics.json

decoder table schema  
spot\_id | gene
